Grade 2 MATH TESTS

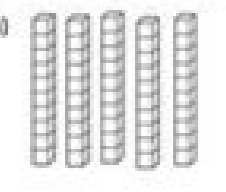

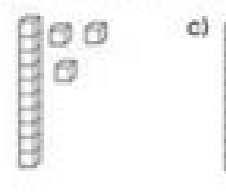

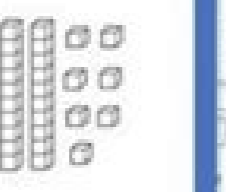

Graphing Test Name: _____

Students voted for their favorite farm animal. Create a graph based on the tally chart below. Don't forget to include the 6 parts of a graph.

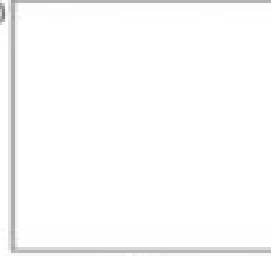

Animal	Tally	Total
Sheep		
Horse		
Cow		
Pig		

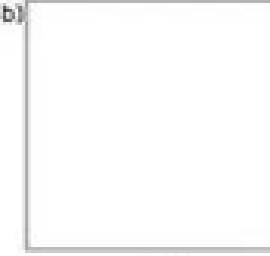

Place Value Test Name: _____

1. Write the number represented by the base ten blocks.

a)  b)  c) 

2. Draw the base ten blocks to represent each number.

a)  43

b)  57

3. How many tens and how many ones are in the numbers below?

a) 67 = _____ tens _____ ones

b) 94 = _____ tens _____ ones

c) 18 = _____ tens _____ ones

Grade 2 Multiplication & Division Test Name: _____

1. Write the multiplication sentences and solve them.

a) 

Based on the Ontario Curriculum Expectations

Expectations

- Grade 2**
- **2-M1-1** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-2** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-3** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-4** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-5** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-6** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-7** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-8** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-9** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-10** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-11** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-12** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-13** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-14** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-15** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-16** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-17** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-18** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-19** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)
 - **2-M1-20** read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)

Lesson plans are linked directly to a corresponding Google Slides presentation

Data Management

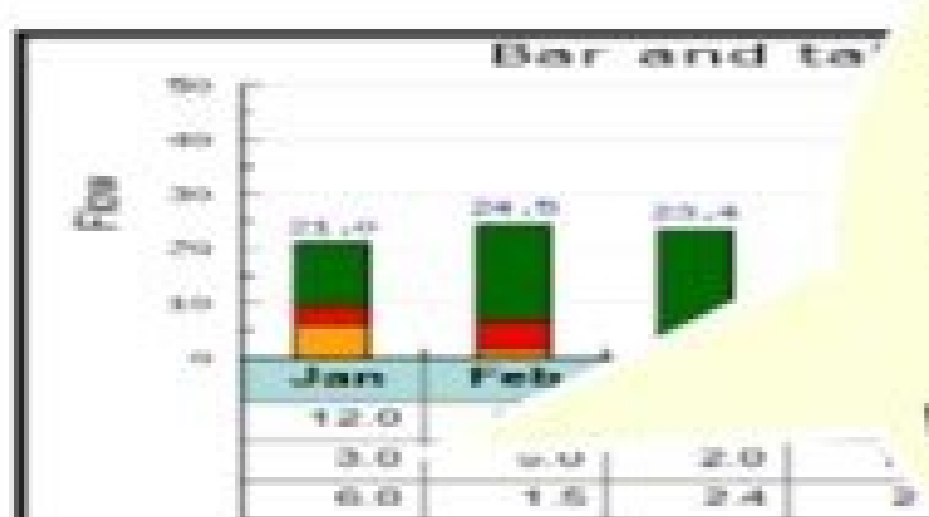

Lesson #1 : Data Relationships

[Presentation Link](#)

Expectation: read, interpret, and draw conclusions from primary data (e.g., survey results, measurements, observations) and from secondary data (e.g., temperature data or community data in the newspaper, data from the Internet about populations) presented in charts, tables, and graphs (including relative frequency tables and circle graphs)

Learning Goal: Today we are learning to read data presentations and interpret their meaning.

Example: What information is presented in the following?

Each lesson contains Expectations, Learning Goals, Minds On, Action, Extension/ Discussion, and Consolidation sections

We've also added Teacher Notes to provide some guidance

Name : _____ Score : _____

Teacher : _____ Date : _____

Converting Between Percents, Decimals, and Fractions

Convert Decimal to Percent

1.55 = 0.4 = 0.963 =
0.86 = 1.89 = 0.521 =

Convert Percent to Decimal

184 % = 35 % = 29.2 % =
83 % = 34.2 % = 144 % =

Convert Decimal to Fraction

0.91 = 1.87 = 0.723 =
1.35 = 0.44 = 0.61 =

Convert Fraction to Decimal

$\frac{18}{10}$ = $\frac{3}{20}$ = $\frac{17}{10}$ =
 $\frac{4}{50}$ = $\frac{5}{8}$ = $\frac{39}{25}$ =

Convert Fraction to Percent

$\frac{3}{16}$ = $\frac{3}{20}$ = $\frac{14}{20}$ =
 $\frac{8}{10}$ = $\frac{33}{20}$ = $\frac{1}{20}$ =

Convert Percent to Fraction

96.2 % = 7 % = 24.2 % =
61.3 % = 89 % = 106 % =

Adding and Subtracting Integers (A)

Find the sum or difference for each question.
